

## CMSC203 Assignment 0

Class: CMSC203 CRN XXXX

Program: Assignment 0

Instructor: Professor Shah

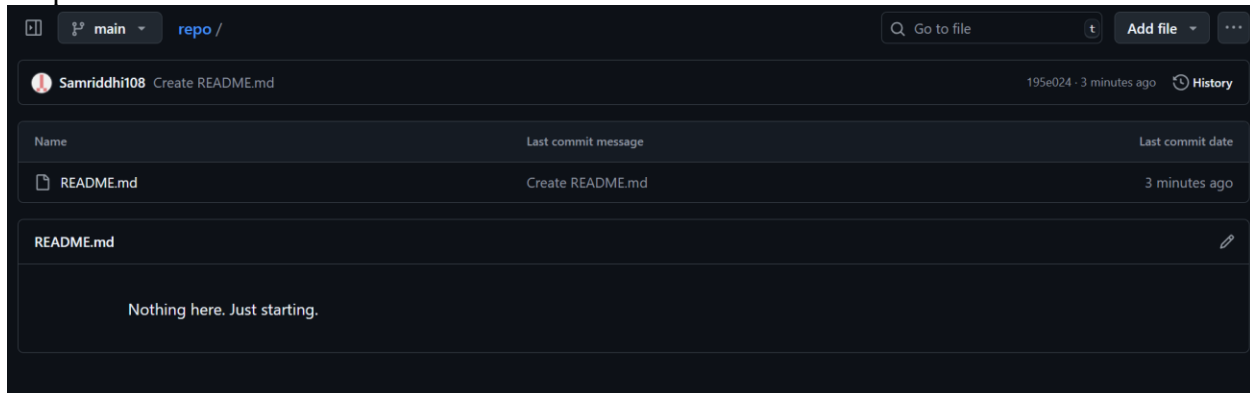

Summary of Description: This assignment helps set up the tools needed for Java programming, like GitHub and Eclipse. Students follow steps and add screenshots to show each part is working.

Integrity Pledge: I pledge that I have completed the programming assignment independently. I have not copied the code from a student or any source.

**Complete the following five parts of Assignment 0.**

**Name your file as FirstInitialLastName\_Assignment0.docx**

**Part1: Setup GitHub:** Provide the screen shots of your GitHub account with Assignment 0 file is uploaded on GitHub:

**Part 2 -Install JDK, Test java Application from Command Line**

Provide the screen shots from Step 1 and 2 here:

```
C:\Users\magra>javac
Usage: javac <options> <source files>
where possible options include:
  @<filename>                Read options and filenames from file
  -Akey[=value]              Options to pass to annotation processors
  --add-modules <module>(<module>)*
                             Root modules to resolve in addition to the initial modules,
                             or all modules on the module path if <module> is ALL-MODULE-PATH.
  --boot-class-path <path>, -bootclasspath <path>
                             Override location of bootstrap class files
  --class-path <path>, -classpath <path>, -cp <path>
                             Specify where to find user class files and annotation processors
  -d <directory>             Specify where to place generated class files
  -deprecation
                             Output source locations where deprecated APIs are used
  --enable-preview
                             Enable preview language features.
                             To be used in conjunction with either -source or --release.
  -encoding <encoding>       Specify character encoding used by source files
  -endorseddirs <dirs>       Override location of endorsed standards path
  -extdirs <dirs>            Override location of installed extensions
  -g                          Generate all debugging info
  -g:{lines,vars,source}     Generate only some debugging info
  -g:none                    Generate no debugging info
  -h <directory>             Specify where to place generated native header files
  --help, -help, -?          Print this help message
  --help-extra, -X           Print help on extra options
  -implicit:{none,class}     Specify whether to generate class files for implicitly referenced files
  -J<flag>                   Pass <flag> directly to the runtime system
  --limit-modules <module>(<module>)*
```

```
new 4 x HelloWorldApp.java x
1  /**
2   * The HelloWorldApp class implements an application that
3   * displays "Hello World!" to the standard output.
4   */
5  public class HelloWorldApp {
6      public static void main(String[] args) {
7          // Display "Hello World!"
8          System.out.println("Hello World!");
9      }
10 }
11
```

```

08/07/2025  10:46 AM                287 HelloWorldApp.java
               2 File(s)                719 bytes
               2 Dir(s)  129,603,407,872 bytes free

C:\Projects\Java_Proj\CMSC203>java HelloWorldApp
Hello World!
```

### Part 3 - Install Eclipse, Test Eclipse Java Application

Provide the screen shots from Step 1 and 2 here:

### Part 4 - Install, Setup, Test Junit Program.

Provide the screen shots showing:

- Eclipse with working JUnit Test example
- Project screenshot
- Running example screenshot

### Part 5 - Install, Setup, and Test JavaFX Application.

Provide the screen shots showing:

- JavaFX Project screenshot
- Running example screenshot
- Java Source Code File

### Lessons Learned <Provide answers to the questions listed below>:

Write about your Learning Experience, highlighting your lessons learned and learning experience from working on this assignment.

What have you learned?

What did you struggle with?

What parts of this assignment were you successful with, and what parts (if any) were you not successful with?

Provide any additional resources/links/videos you used to while working on this assignment.

### Check List: <Provide answers to the column Y/N or N/A >:

#		Y/N	Comments
1.	<b>Assignment files:</b>		
	• FirstInitialLastName Assignment0.docx/pdf	Yes or No	
	• Source java files	Yes or No	
2.	<b>Program compiles</b>	Yes or No	
3.	<b>Program runs with desired outputs related to a Test Plan</b>	Yes or No	
4.	<b>Documentation file: Screenshots of</b>		
	• Part1: Setup GitHub	Yes or No	
	• Part 2 -Install JDK, Test java Application from Command Line	Yes or No	
	• Part 3 - Install Eclipse, Test Eclipse Java Application	Yes or No or N/A	
	• Part 4 - Install, Setup, Test Junit Program	Yes or No or N/A	
	• Part 5 - Install, Setup, and Test JavaFX Application.	Yes or No or N/A	

	<ul style="list-style-type: none"><li>• Lessons Learned</li></ul>	<b>Yes or No</b>	
	<ul style="list-style-type: none"><li>• Checklist is completed and included in the Documentation</li></ul>	<b>Yes or No</b>
